

2000 Ford E 150 Passenger Van

This is a rear wheel drive 10 passenger van, with 98,951 miles; Silver in color with a 4.6 Liter V-8 engine, automatic transmission.

The van has no working A/C and the front heater works intermittently.

Side entry doors behind the passenger front door do not work correctly; one will open from inside only and the other one does not open.

Rear doors issues, one opens fine and the other one needs repaired.

The engine runs, but is in need of a tuneup and has a possible coolant leak.

Transmission has started to not go into park all the way (could roll out of park if on a hill).

There is some rust on the roof, as well as clear coat peeling off in places.

The interior has the usual amount of wear in it, with the headliner coming down in different places.
